### PROFESSIONAL PROFILE

Frontend Developer with progressive experience building responsive, high-performance websites and web applications using Next.js, React.js, JavaScript, and WordPress. Experienced in translating UI/UX designs into reusable components, integrating REST APIs, customizing WordPress and WooCommerce, and optimizing websites for speed, SEO, accessibility, and cross-browser compatibility. Strong Computer Science foundation with additional experience in hosting, domains, troubleshooting, and production support. Focused on clean code, scalable interfaces, polished user experiences, and reliable delivery.

### WORK EXPERIENCE

**Jan 2026 – Present  Frontend Developer | Next.js & React.js  |  Servix Agency**

- Build responsive, production-ready web interfaces using Next.js, React.js, JavaScript, HTML5, CSS3, and Tailwind CSS.
- Translate UI/UX designs into reusable components and responsive layouts with consistent behaviour across desktop, tablet, and mobile.
- Integrate REST APIs and dynamic data, implementing forms, validation, loading states, error handling, and interactive user flows.
- Maintain and customize WordPress and WooCommerce websites, including page layouts, product experiences, checkout enhancements, and custom styling.
- Improve page speed, Core Web Vitals, accessibility, technical SEO, and cross-browser compatibility while supporting deployment and production fixes.

**Jan 2025 – Dec 2025  Frontend & WordPress Developer  |  Roaa PDA**

- Developed responsive websites and landing pages using WordPress, Elementor, HTML, CSS, and JavaScript.
- Customized themes, page templates, navigation, forms, and reusable content sections to match brand and user-experience requirements.
- Maintained website content and functionality, resolved frontend issues, and improved mobile responsiveness and cross-browser consistency.
- Supported hosting, domain, deployment, backup, and website maintenance tasks to keep digital platforms stable and available.

**Jan 2024 – Dec 2024  Web & WordPress Developer  |  Namaa Foundation**

- Built and maintained responsive WordPress pages for organisational programmes, campaigns, news, and public-facing information.
- Implemented frontend updates using HTML, CSS, JavaScript, and WordPress page-building tools while following established brand guidelines.
- Optimized page structure, images, navigation, and mobile layouts to improve usability, performance, accessibility, and search visibility.
- Handled website troubleshooting, content updates, forms, backups, hosting coordination, and day-to-day technical website support.

**Jan 2023 – Dec 2023  Frontend Developer | React.js  |  CodeSoft**

- Developed responsive frontend interfaces for business and ERP-related web applications using React.js, JavaScript, HTML, and CSS.
- Built reusable components, forms, tables, and data-driven UI elements and connected them with backend services through REST APIs.
- Debugged interface issues, improved usability and responsiveness, and collaborated on feature testing and production-ready releases.

**Jan 2022 – Dec 2022  Junior Frontend & WordPress Developer  |  SoftKhana**

- Created responsive landing pages and website sections using HTML5, CSS3, JavaScript, and WordPress.
- Customized WordPress themes, styling, page layouts, and content while supporting domain, hosting, and website deployment tasks.
- Tested websites across devices and browsers, fixed layout and functionality issues, and provided ongoing website maintenance support.
